

Blackjack

The Rules of Blackjack - The value of your chips is written on the chip itself, the values are 5's 25's, 100's and 500's, so when a guest hands over a 100 note, they would get 100 worth of chips (Usually 10 5's and 2 25's). When you're done playing at blackjack and wish to leave or play at another table, please redeem your chips in exchange for a Fun Casino Check so the chips can be used by other guests once you have left.

In Blackjack, everyone plays against the dealer. Players will place their bet on the square in front of them, then they will receive 2 cards face up and the dealer's first card is face up and the second is face down. The object of the game is to get closer to 21 than the dealer without going over 21. If a hand goes over 21, it is called a "bust" or "break" and the wager is lost. In 21, Jacks, Queens, Kings and 10s count as 10. An Ace may be played as a one or an 11. All other cards are played at face value.

When you receive your first two cards, you may either "stand" or "hit." When you "stand" it means you feel you are close enough to 21 and no longer wish any additional cards and indicated by waving off with your hand or simply saying 'STICK'. If you wish to receive another card or "hit," tap or the table behind your wager with your finger, or simply say 'HIT'. In either situation, you will never touch the cards, everything is communicated using hand signals or speech. You may draw as many cards as you want until you are close to 21 or until you "bust."

If you are closer to 21 than the dealer, you win and are paid an amount equal to your original wager. If your hand is less than the dealer's, you lose. If the dealer's hand "busts" or "breaks," you win as well. Ties are a standoff or "push" and your bet remains on the table.

If your initial two cards total 21, any Ace with a 10, Jack, Queen, or King, you have a Blackjack. Blackjack is paid 2 to one.

In Blackjack, the player has many options to choose from:

Splitting Pairs

If your first two cards have the same numerical value, you may split them into two hands. The bet on the second hand must equal the original bet. If the split pair is Aces, you are limited to a one-card draw on each hand.

Doubling Down

After receiving your first two cards you may elect to wager an additional amount not to exceed the value of the original bet. With a double down, you will be dealt one additional card only.

Insurance

If the dealer's face up card is an Ace, you may elect to take insurance. The insurance bet is a wager that the dealer has a blackjack. You may bet up to one half of your original bet. Insurance bets pay 2 to 1 if the dealer has a blackjack, but lose in all other instances.
